

TRI-FLOW™ LUBRICANTS

Tri-Flow® is the superior lubricant with a unique formulation of premium oils, penetration and protection ingredients, extreme pressure additives and Teflon*. It is designed to go beyond ordinary lubricants, keeping sporting and recreational equipment operating at its peak, even under heavy load, high wear or other extreme conditions.

Tri-Flow™ with Teflon — superior lubrication under even the most severe conditions.*

- Moving Parts — friction and wear
- Wear — reduced part life, downtime and poor performance
- Higher Equipment Value — greater need for superior lubrication

Penetrates

- Washes away corrosion, dirt, contaminants
- Light viscosity allows penetration into inaccessible areas
- Dissolves, prevents build-up of hardened grease, sludge, hard carbon deposits

Protects

- Displaces moisture
- Inhibits corrosion
- Keeps lubricating under severe conditions; temperature extremes (-60° to +475°F), salt spray, high humidity
