

WD-40

Known as “the can with a thousand uses.” WD-40 protects metal from rust and corrosion, penetrates stuck parts, displaces moisture, and lubricates just about anything. WD-40 is also great when it comes to cleaning grease, grime, and other marks from most surfaces.

2 oz.

8 oz.

11 oz.

Five basic functions:

- **Cleans:** WD-40 gets under dirt, grime and grease to clean. It also dissolves adhesives, allowing easy removal of labels, tape, stickers, and excess bonding material.
- **Displaces Moisture:** Because WD-40 displaces moisture, it quickly dries out electrical systems to eliminate moisture-induced short circuits.
- **Penetrates:** WD-40 loosens rust-to-metal bonds and frees stuck, frozen or rusted metal parts.
- **Lubricates:** WD-40’s lubricating ingredients are widely dispersed and hold firmly to all moving parts.
- **Protects:** WD-40 protects metal surfaces with corrosion-resistant ingredients to shield against moisture and other corrosive elements.

Part No.	Description
WDF 10002 -----	2 oz. aerosol can, carded
WDF 10008 -----	8 oz. aerosol can
WDF 10011 -----	11 oz. aerosol can
