

LOCKSMITHING TOOLS

General Motors Lock Decoder

This quality tool makes everyone a professional from the start. Decode all year General Motors sidebar locks without complete disassembly. This unique tool works when all others fail. Instructions included.

Part No.: AIS 6

Grooved Tweezer

Straight Blades For Easy Top Pin Loading

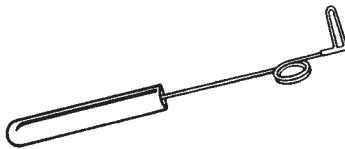

Specially grooved for pinning, these tweezers offer straight, parallel blades for ease of top pin loading. Optimum design for I/Core.

Part No.: AIS 29

Tension Wrench

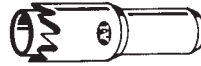

"Feather Touch"

The secret of picking some locks is a light turning pressure. This tool automatically adjusts to the proper tension. By using this wrench designed with a coil spring principle, any pressure can be applied, from a small fraction of an ounce to four ounces.

Part No.: AIS 11

Tubular Lock Saw

Made to last, A-1's rotary saw cuts away the shoulder over pins to allow them to be removed and lock opened. Since the pins remain intact, they can be measured to decode the lock in a situation such as a laundromat, where numerous locks are keyed alike. It will also open locks with ball bearings in the keyway, but should not be used on locks with dead pins. This saw will cut brass or steel 137 standard locks at low speed. Not recommended or guaranteed for over 1000 rpm.

Part No.: AIS 14

Cylinder Removal Tool

This cam action tool allows you to remove stubborn mortise cylinders. This heavy-duty tool automatically adjusts from 15/16" to 1 1/2" in diameter. Heat treated and plated.

Part No.: AIS 16

Curved Shims

Chrome plated, A-1 quality firm shims.

Part No.: AIS 19

Shim Holder

This tool holds curved shims firm, straight and without slippage to prevent cut fingers and make your job easier. Comes with 25 top quality shims. To use: Tap small end on hard surface; insert shim to desired length; press down on large end and shim is tight.

Part No.: AIS 18

A-Pick

Made of heat treated stainless steel, the A-Pick can open 137 standard tubular locks with mushroom pins and will pass all dead pins. In addition, once the lock is opened, the A-Pick can be quickly decoded using the decoder supplied. This is a precision instrument with built-in quality to do the job. Comes with easy-to-understand instructions.

Part No.: AIS 20

A-Pick Kit

A kit containing A-1's #20 and #20X. Includes A-1 tubular key decoder

Part No.: AIS 20-SET

Automotive Rocker Pick Set

8 Piece

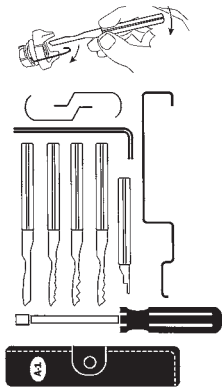

8 of A-1's favorite rocker picks. Use for domestic and foreign automotive applications.

Part No.: AIS 47

LOCKSMITHING TOOLS

G.M. 10-Cut Pick Set

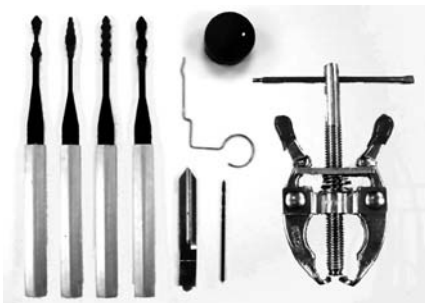

This set of tools will allow you to pick and decode G.M. 10-cut ignitions in minutes. Simply insert the special Tension Tool to apply sidebar pressure then pick the lock with your choice of 4 especially designed Rocker Picks. Once the lock is picked, use the Cylinder Release Tool to release the ignition from the Column. After removal, the plug can be decoded quickly and effortlessly using the Depth Gauge.

- Includes all tools required
- Tension tools
- 4 rocker picks with leather case
- Depth Gauge
- Cylinder release tool
- Service manual
- Lower shroud required on trucks only (tools included)

Part No.: AIS PS2

Ford 8-Cut Pick Set

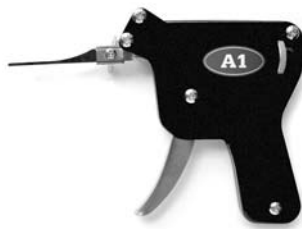

For Side Bar Ignitions

Similar to A-1's automotive picks for General Motors, these tools are designed to professionally pick Ford ignitions without damaging the locks or bezel. This set includes a unique bezel removal tool, a jig with .070 drill bit for drilling the pilot hole, a special tension tool for disabling the side bar, and four rocker picks.

Part No.: AIS PS4

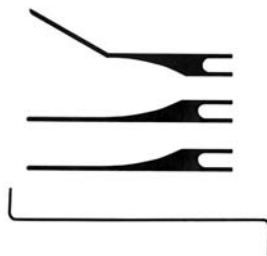

Magnum Pick Gun

Features easy tension adjustment. Three tips and tension wrench are included. This gun can be easily disassembled for maintenance. A 5-year warranty included.

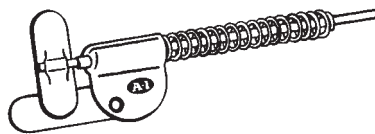

Part No.: AIS 44

Replacement Parts

Part No.: AIS 44 REPL

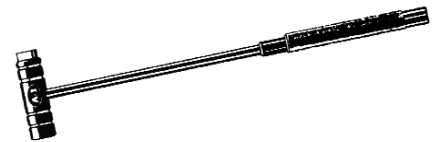

Plug Spinner

Frequently it is almost impossible to pick a lock in the right direction, but easy to pick it backward. That's when this tool is a must. With the lock picked in the wrong direction, simply wind the spinner 1 1/2 turns (in whichever direction necessary), set the trigger, insert the blade into the plug, release the trigger, and the plug is now picked in the right direction.

Part No.: AIS 26

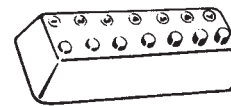

Master Locksmith Hammer

So many locksmith jobs require a light weight hammer. A-1's is manufactured specifically to meet your needs. This 2 oz. hammer features a head with one end brass, the other durable, non-marring plastic.

Part No.: AIS 28

Ace Key Decoder

Decodes "Ace" keys quickly, easily, and accurately.

Part No.: AIS 52

Get-A-Grip Puller

This hex handled, spiral key puller offers a better way to Get-A-Grip. It features an extra long spiral and a hexagonal handle.

Part No.: AIS 30

Mega Grip Puller

Similar to the popular Get-A-Grip, but with an exceptionally large .074 Spiral. Great for use on many imported autos.

Part No.: AIS 30B

Get-A-Grip Set

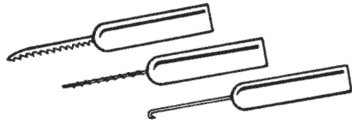

2 each of A1's popular Get-A-Grip and Mega Grip Key Pullers in 1 convenient set.

Part No.: AIS 30-SET

LOCKSMITHING TOOLS

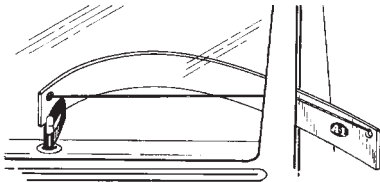

Broken Key Pullers

Made of top quality American steel. Blades are locked in steel and fitted with a comfortable handle. A kit of three extractor types: .040 spiral, saw tooth, and hook.

Part No.: AIS 27

Vulcan Button Grabber

Unique rubber loop grabs and holds buttons, without damage. A simple but effective car opener that holds most buttons, even straight ones Easily enters through door jam. Use strings for alignment.

Great for Mercedes, BMW, Volvo

Part No.: AIS CO2

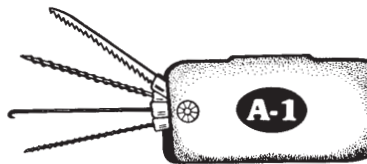

Fighting Wedge

Fortified inflatable wedge can exert extreme pressure to widen the gap with your favorite car opening tools. Also use for Safes, window and door installations. Superior release valve.

Part No.: AIS 43

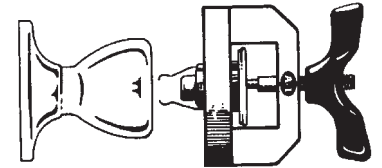

Key Puller Set

An assortment of extractors in a genuine leather case. A high quality broken key puller set includes 4 extractors: Hook, Standard Spiral, Large Spiral, Saw Tooth.

Part No.	Description
AIS KP1	-----Key Puller Set

Quickpull

Pull popular key-in-knob cylinders in seconds! Snap cylinders out without disassembly of knobset or removal of interior knob. Use this tool to save a tremendous amount of time, especially on large re-keying jobs.

Part No.	Description
AIS QP	-----Quickpull
AIS QPBL	-----Replacement blade for QP
AIS QPRP	-----Repair Kit for QP

Quickpull 2

Similar to the original, this tool removes knobs for Schlage 'F' series. Using the additional tools included, replacement of the original knob and cylinder can be accomplished quickly and effortlessly, saving valuable time on the job. Knob can be removed from the exterior and replaced in just minutes.

Part No.	Description
AIS QP2	-----Quickpull 2
AIS QP2B	-----Replacement blade for QP2
AIS QP2RP	-----Repair Kit for QP2

Adjustable Tension Wrench

Designed for picking double-bitted locks, but also works for most paracentric keyways. Leaves keyway open for pick. Just right for auto locks with spring loaded dust covers. The spring steel fingers adjust to the desired width by sliding the adjusting collar.

Part No.: AIS 24

LOCKSMITHING TOOLS

Spinnakur Plug Spinner

Space age plug spinner. Made of durable materials, this tool will offer years of reliable service. Features spring mechanism, push button release, left or right rotation, streamlined design. Weighs only 2 1/4 oz. Fits in your shirt pocket or most pick kits.

Part No.: AIS SP1

Waffle Tray

Make your workspace efficient. Especially useful space saver for the van. Keep springs, pins and plug neatly separated and in numbered pockets with this popular tool. Made from coated metal. It is small and stackable.

Part No.
AIS WT1

Ejector Punch

Originally designed for use with "The Block", this single ejector punch is suitable for most any I/Core.

Part No.
AIS TBIP

Decoding Tool For I/C Core

When a control key code must be found for an interchangeable core system, The Block offers a foolproof solution. Simply drive the pin stacks into The Block where a pin tray keeps them separated and in order.

Superior to shimming or disassembly; all pin stacks are kept in their original array for decoding and replacement into the cylinder.

Part No.
AIS TB1

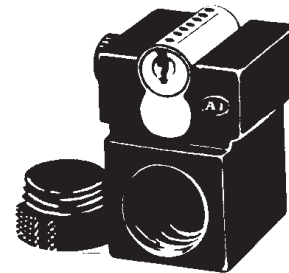

Capping Block

A-1's capping block has the added advantage of offering two tops, allowing you to cap Best, Eagle, KSP, Arrow and even the Falcon Style with the "slide" style spring cover. More than just a capping block, this tool is a complete and versatile workstation. No mobile shop should be without this time-saver.

Part No.: AIS TB2

Dumping Block

With A-1's Dumping Block, you have the added security of knowing that your customer's security is maintained. Dump old cores to assure that no one can determine the control key code of your system. Also a big time-saver when re-keying, this tool will allow you to dump and hold the contents of dozens of cores.

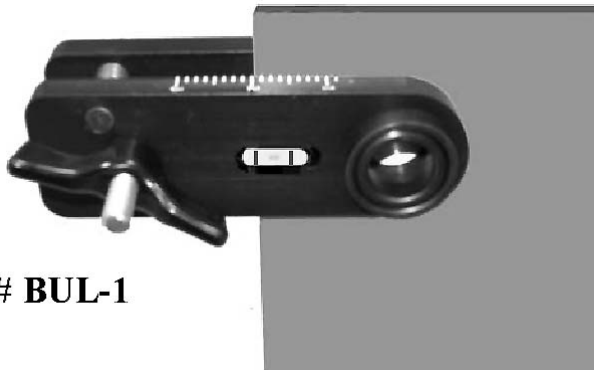

Part No.: AIS TB3

Pak-A-Punch™ Code Cutter

Model 3S is setup for Schlage/Primus. No additional attachments required. This machine can also punch automotive I/Core & Kwikset by ordering the appropriate accessories.

Part No.
AIS PAK3S

LOCKSMITHING TOOLS**Cabinet Lock Installation Jig**# **BUL-1**

This jig is designed to install 2 styles of cabinet locks:

- Cam locks using 7/8" cross-bore
- I/Core Locks using 1 1/4" cross-bore

Manufactured of aircraft grade aluminum alloy, and steel bushing. Both side of this jig are identical and include 1/8" graduated backset markings. The built-in level provides for easy and accurate setup.

Part No.: AIS BUL-1

Bulls Eye Installation Tool for Cylindrical Locksets

Use this tool when locating and drilling crossbores and latch holes when installing cylindrical locks. Uses conventional hole saws. Economically designed for locksmiths, this new tool is equipped to drill 1 1/2" and 2 1/8" cross bores and includes an automatic backset adjustment that requires no additional tools.

Part No.: AIS BUL-2

Kelly -Klamp

An innovative tool that is like a third hand for installing overhead magnets.

Part No.: AIS K100
