

COMPUTER SECURITY

PC-Security™ Universal SuperBond Kit

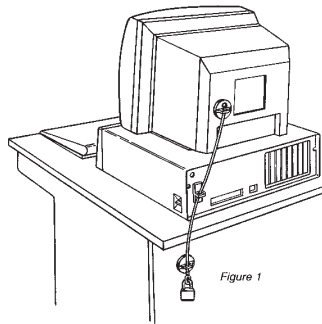

This revolutionary new three plate security system is small, powerfully strong yet attractive. The distinctive cast metal plates have vinyl surfaces that are activated with Qualtec's "Super Bond" adhesive. This provides a quick easy "industrial strength" bond, with over 700 pounds (318 kgs) of holding strength. The unique low profile, extra strength PC Security Kit enables the user to not only secure desktop computers and peripherals, but laptops, notebooks, fax machines, copiers, phone systems, audio/visual equipment, etc. This universal security kit provides asset control and deters opportunistic theft.

Bond one of the "Super Bond" plates to each piece of the equipment you want to secure, weave the cable through each plate and lock in place (Figure 1).

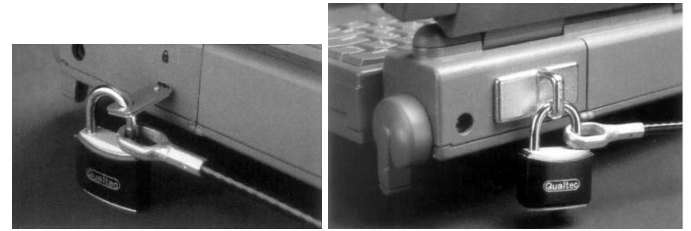

Kit Includes:

- Two 1 3/4" round plates
- One 3/4 x 2" rectangular plate
- One 5 ft. steel cable
- One 3 gram bottle of "Super Bond" adhesive
- Keyed lock with two keys
- Available Master Keyed and Keyed Alike
