

**PANIC BAR RETAINER**

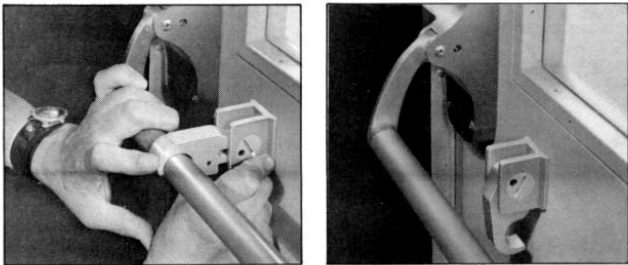

Panic Bar Retainer

*Reduce Panic Bar repair and replacement costs with the Panic Bar Retainer, the patented device that extends Panic Bar Life, and can actually pay for itself in a year.*

Guaranteed to reduce expenses for panic bar repair and replacement. With the Panic Bar Retainer, you can set and hold panic bars in an open position with a simple flick of the wrist.

To keep the door unlocked during heavy daily use, simply depress the bar and place the hook over it — you'll eliminate wear and tear on the locking mechanism as the door constantly opens and closes. Later, the specially designed pushbutton release lets you lift the hook off the bar and return it to the lock position.

The D100 is specifically designed for Von Duprin 88 Series panic hardware, but will fit most brands with a round bar design.

<b>Part No.</b>	<b>Description</b>
