**1600 Series Surface Bolts**

*Concealed Mounting*

IVS SB1630 TL

IVS SB1630 BL

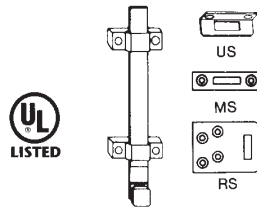

Heavy duty steel (1630 models) or brass (1640 models). All units have a full 1" throw for maximum security and are ideal for all types of doors. UL listed for use on inactive door or a pair of doors up to 8' in height. Locking bolts are furnished with two keys, can be locked in up or down position. 1630 Series zinc plated, 1640 Series are F/O.

*Other Features:*

- Fully concealed mounting prevents vandalism.
- Units furnished with either universal top strike or flat bottom strike.
- Units packed with wood and machine screws to meet most field conditions.

<b>Part No.</b>
IVS SB1630 BL 603
IVS SB1630 TL 603

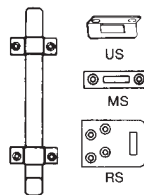

**Surface Bolt**

Steel. For use on labeled fire doors. UL Listed. 8" x 2 1/32" (5" and 12" available on F/O). 1 5/16" projection. 1 3/16" throw. Supplied with US and MS strikes. RS available on F/O at additional cost. 5 per box.

**ARCHITECTURAL HARDWARE**

**Manual Flush Bolt**

*For Metal Doors "Non-Handed"*

IVS FB458

IVS FB458 manual flush bolt with 12" rod, fits standard ANSI preparation for metal doors. Faceplate is 1 x 6<sup>3</sup>/<sub>4</sub>"

The FB458 is equipped with a spring loaded snap action lever. When the active door is opened, the lever can be moved to the "up" position, retracting the bolt and allowing the inactive leaf to be opened. When the inactive leaf is closed, the lever can be moved to the "down" position, projecting the bolt securely locking the inactive leaf.

The FB458 is non-handed, with a 5/8" throw. The standard rod length is 12", with 6, 9, 18, and 24" available on F/O. The FB458 is UL Listed for Fire Doors and made from forged brass.

- Part No.**

 IVS 260-B-605----Polished Brass

**Automatic Flush Bolts**

*For Metal or Wood Doors*

IVS FB31P

IVS FB41P

Reduced Activation Force

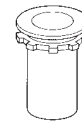

- Single Bolt Application — UL Listed for Fire Doors
- Non-Handed
- 3/4" throw with 7/8" vertical adjustment
- 12" Rod standard, 18, 24, 36 and 48" available on F/O (Non fire rated openings)

The FB31P for hollow metal doors contains an FB31T top bolt and an FB31B bottom bolt. These units are non-handed, but the top and bottom bolts are not identical. The top bolt has no spring tension and provides a significant reduction in activation force.

The FB41P for wood doors consists of an FB41T top bolt and an FB41B bottom bolt. These units are non-handed, but the top and bottom bolts are not identical. The FB41T top bolt has no spring tension and therefore provides a significant reduced activation force.

**Door Coordinator**

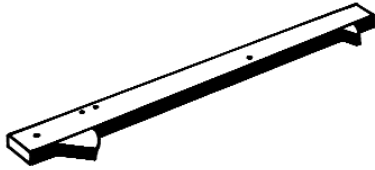

Solid Brass. Reversible, automatic coordinating device for use on pairs of doors to prevent the active door leaf from closing ahead of inactive door. Specifically designed for use on labeled fire doors in conjunction with IVES automatic or self-latching flush bolts.

- Surface mounted
- Six bolts required for door bracket for installations on wood covered composite 1<sup>3</sup>/<sub>4</sub>" thick labeled doors
- Exclusive design incorporating unique cam contour with assisting nylon roller reduces friction and increases efficiency of hardware system
- One per box

- Part No.**                      **Finish**  
 IVS COR7G 626-----Satin Chrome Plated

ARCHITECTURAL HARDWARE

COR Series Coordinators

The COR Series Coordinators are designed for use on pairs of doors when one door needs to close before the other.

All COR units function easily. The active door lever, located nearest to the active stop, holds the active door ajar until the trigger mechanism is released to the retracted position by the closing of the inactive leaf. All COR units are equipped with a safety release mechanism which allows the active door to close if under extreme pressure, preventing damage to COR, doors or hinges. All COR's are compatible with IVS Automatic Flush Bolts, FB31 and FB41. IVS Coordinators and Flush Bolts have been tested a minimum of 100,000 cycles by an independent laboratory. The COR Series does not cover the entire length of the stop, so a filler bar can be provided to maintain architecturally clean lines. Specify FL20 for filler up to 20", FL32 up to 32".

Coordinators and fillers are made of aluminum. UL listed for installation on labeled frame.

Mounting Brackets

IVS MB1

IVS MB2

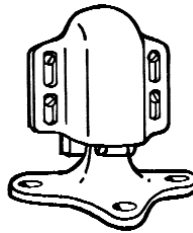

Allows stop-mounted hardware, such as parallel arm closer on surface mounted vertical rod strike, to be properly installed without damaging the COR coordinator. Stop mounted hardware will need to be lowered to compensate for the height of the coordinator and mounting bracket. Use MB1 for stop width over 2 1/2", use MB2 for stop width up to 2 1/2". Prime coated.

Part No.

- IVS MB1 600
- IVS MB2 600

DOOR HOLDERS

Automatic Floor Door Holders

Forged of durable brass. Door position adjustable. Activation of unit is accomplished automatically when door is opened. A firm pull on the door releases the mechanism.

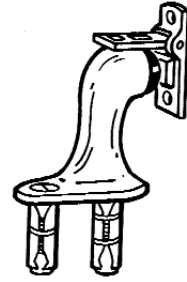

Furnished with strikes of varying heights to accommodate different door to floor clearances, these models are ideal for heavy traffic situations that require a simple, fool-proof hold open device. Units are furnished with universal screw pack to allow for installation in all types of construction.

Part No.

Door to Floor Clearance

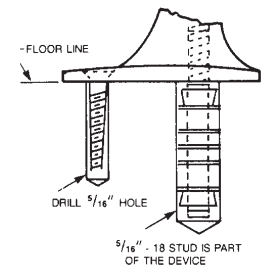

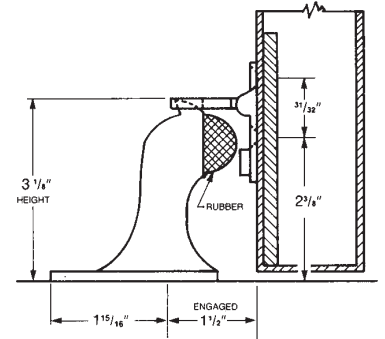

- IVS FS40 626 ----- 1/2" or less
- IVS FS41 612 ----- 9/16 - 1 1/16"

**Kick Down Door Holders**

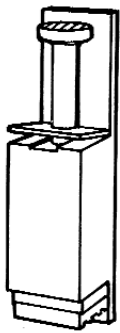

An attractive yet positive and economical method of hold-open. Cast of durable iron, these models are available in a variety of sprayed finishes, including bronze (SP10), brass (SP4) and aluminum (S28). Hold open and release are activated with a touch of the foot. Round non-marring rubber shoes have corrugated bottoms to provide secure grip and a shank which forms its own thread when screwed into threaded cavity of holder. When worn, shoes are easily replaced (see below). Ideal for use on all type of doors where door-to-floor clearance is 2".

**Part No.**  
 IVS FS 544 4 SP10

 IVS FS 544 4 SP4

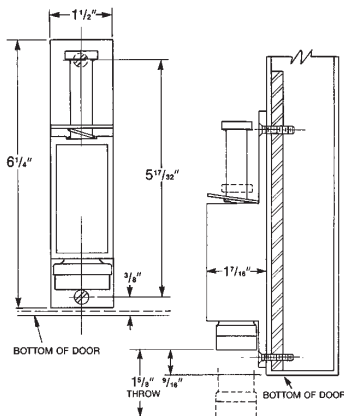

*Rubber Shoe only: (Pk 6)*  
 IVS FS544 Non-threaded  
 IVS FS544 Threaded

**PLUNGER DOOR HOLDERS**

**Door Holder**

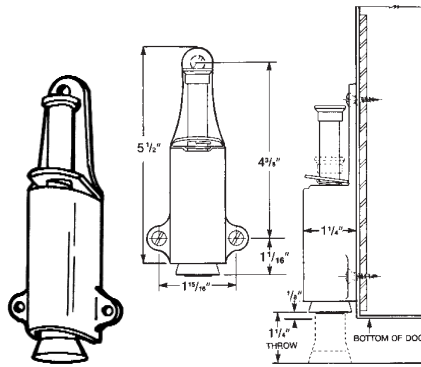

Provides a contemporary yet economical method of positive hold-open. Body is sturdy cast aluminum. Spring operated plunger activates with minimal pressure, releasing instantly with a light tap on the platform lever. Ribbed non-marring rubber shoe is securely fastened to unit and is easily replaced when worn.

**Part No. Description**  
 IVS FS1153 628 -----Plunger Door Holder  
 IVS FS1153 RS -----Rubber Shoe only

**Door Holder**

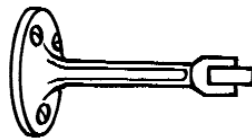

Combines conventional design with strength in an attractive cast brass or bronze body. Plunger and internal parts are plated steel and provide a 1 1/4" throw for all types of doors. Plunger is easily activated with minimal pressure, releasing instantly with a light tap on the platform lever. Round non-marring rubber shoe is securely fastened in flanged cup to prevent movement or loss. Rubber shoe is easily replaced when worn.

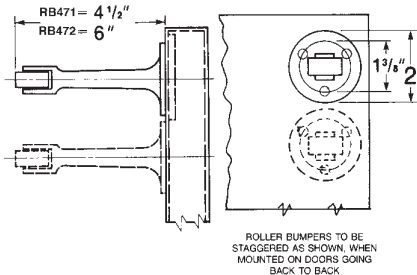

**Part No. Description**  
 IVS FS1154 612 -----Door Holder  
 IVS FS 1154 626 -----Door Holder  
 IVS FS1154RS -----Rubber Shoe only

**ROLLER BUMPERS**

**Roller Bumpers**

Heavy-duty cast brass. Used where two doors open against each other to prevent damage to the doors or hardware. These units, mounted along the top rail, feature solid rubber rollers securely fastened to the stem and 3 holes for positive mounting. Straight arm design with a round base, the RB471 projects 4 1/2" while the RB472 projects 6". These models are ideal for use in situations where doors meet each other at approximate right angles (back to back).

**Part No.**  
 IVS RB471 626  
 IVS RB472 626

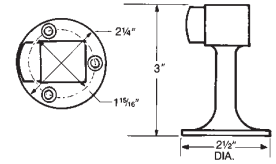

**DOOR STOPS**

**Floor Mounted Stop**

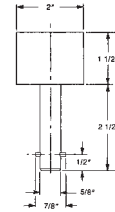

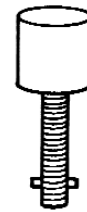

Cast brass construction ideal for interior or exterior use. Packed with expansion shield and lead shield

**Part No.**  
 IVS FS 444 626

**Security Door Stop**

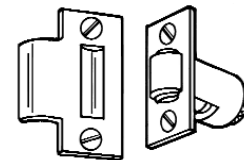

Designed for use in high vandalism areas. Molded from flame retardant, resilient material around a heavy duty stud which, once grouted in concrete, leaves no exposed fasteners to be tampered with or removed. Ideal for jail or security cell areas where floor mounted stops are required.

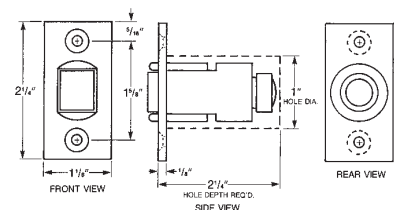

**Part No.** IVS FS 185

**LATCHES**

**Roller Latch**

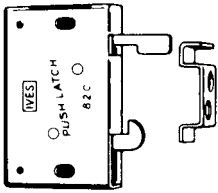

Ives RL32F Roller Latch is constructed of bronze or stainless steel and is designed to fit a heavy duty cylindrical lock mortise. Rugged cast unit features a solid brass roller (nylon covered for silencing). Normal closing of door engages roller in groove on strike, thereby holding the door shut. Unit is easily adjustable, allowing for variance in door clearance. Latches are provided standard with 2 3/4 x 1 1/8" strikes but are available with ASA (specify STK726).

**Part No.**  
 IVS RL32F 630

LATCHES

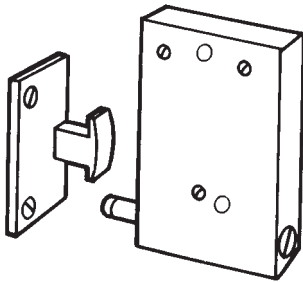

Push Latch

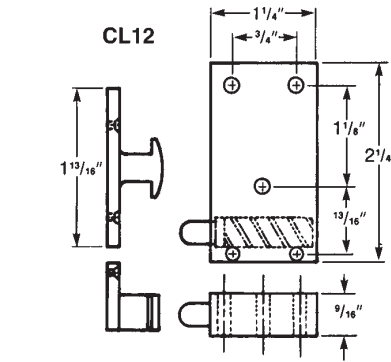

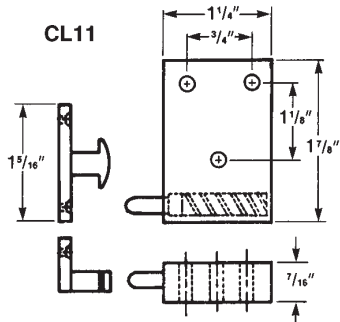

For lightweight cabinet doors  
Steel,  $25/16" \times 1\frac{1}{2}" \times 5/16"$ . 10 per box.

**Part No.** IVS 820-F-603  
**Finish** -----Zinc Finish

Invisible Latch

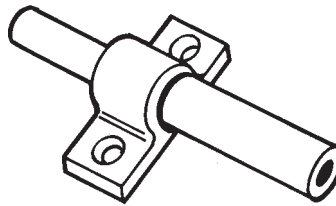

Ideal for installations where no visible latches are desired. Units can be installed at the top, bottom or side of the door and can be mounted flush in the door stop or on the surface of the stop. The CL11 latch is recommended for use on small panels, cabinet doors or light closet doors, while the CL12 latch is used on larger panels or regular size doors. Operation of both models is simple, with latching accomplished by a slight push. A harder push releases the door.

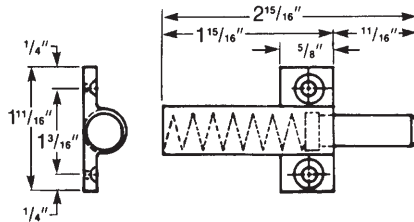

**Part No.**  
IVS CL11 612 F/O  
IVS CL12 612

Auxiliary Pusher

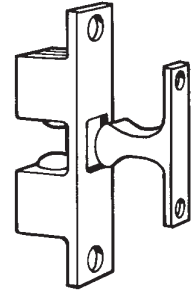

IVES CL14 Auxiliary Pushers are constructed of bronze designed to aid operation of CL11 or CL12 latch in cases where hinges or surrounding conditions prevent smooth operation of door. Provides full  $1\frac{1}{16}"$  throw.

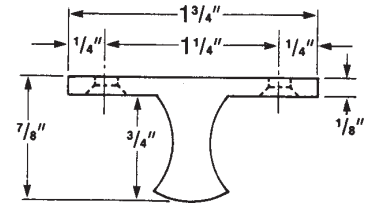

**Part No.**  
IVS CL14 612 F/O

Ball Type Latches

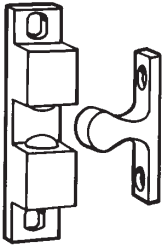

Ives CL21A is ideal for closet doors, access doors, hinged openings and numerous other applications. Unit is provided with a plate type strike. Strike can enter from any direction and can be surface mounted or mortised into frame. Tension of units is easily adjusted to meet field conditions. Brass construction.

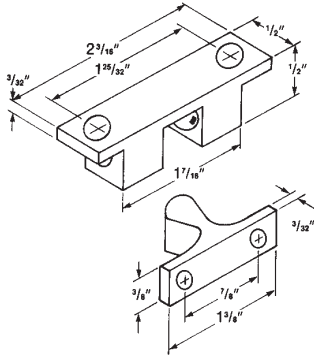

**Part No.**  
IVS CL21A 612  
IVS CL21A 626

**LATCHES**

**Ball Type Friction Latch**

Brass construction Ideal for smaller cabinet doors or panels. Similar to Model CL21A in design but strike can enter only from front or either side. Tension of unit is easily adjusted to meet field conditions.

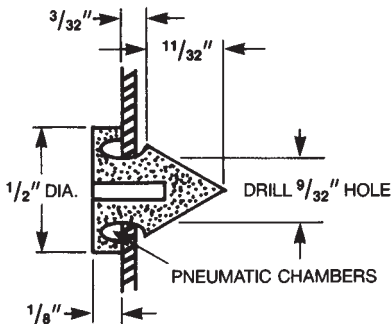

**Part No.**  
IVS CL22 612  
IVS CL22 626

**SILENCERS**

**Door Silencer for Metal Frames**

For use on metal frames featuring pneumatic design that, once installed, forms an air pocket to absorb shock and reduce noise of door closing. Tamper-proof once installed on the frame. Proper installation also eliminates door rattle and provides constant tension for door latches or locks. Gray color, packed in bags of 100.

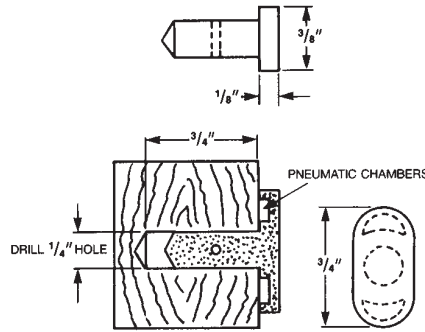

**Part No.**  
IVS SR64

**Door Silencer for Wood Frames**

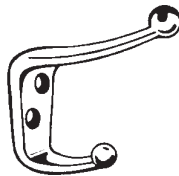

For use on wood frames, also feature pneumatic design to cushion shock and absorb noise. To prevent removal, a small brad should be driven into stop strip and through stem of silencer, as shown in the detail. Gray color, packed in bags of 100.
