

LOCKSMITHING TOOLS

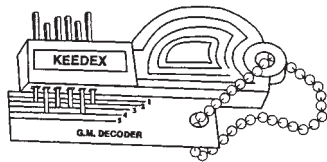

Clip Removal Tool

Special feature — spring loaded ball bearing holds automotive cylinder clip in tool until YOU want it removed. Design allows the Jaws II-L to bump up against the lock to help remove clips that are hard to take off.

Part No.: KDX K 2

G.M. Decoder

Decodes all tumblers in one step without complete disassembly of the lock. Pick side-bar down. Press the K-4 firmly into the 6 chambers of the lock. Read cuts with gauge provided.

- Made of Lexan
- Guaranteed for life
- Stainless steel fingers
- Durable aluminum card
- Instructions and case included

Part No.: KDX K 4

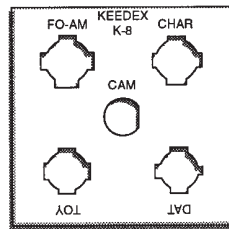

Master Follower

This remarkable follower is a wise choice for either the newcomer or master locksmith. Made of SOLID BRASS, it will outlast those made of plastic or aluminum. The capabilities of this machined follower far exceed any follower on the market today. It can be used as a regular follower or master pin remover and follower on Schlage, Sargent, Kwikset, Weiser, Almont Padlocks and many others. Special taper allows smooth operation and better control over sticking pins.

Part No.: KDX K 6

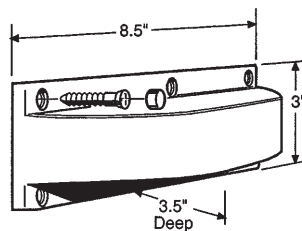

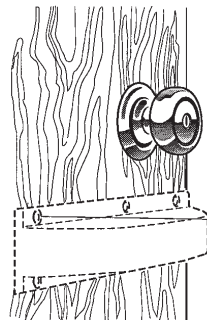

Impressioning Plate

Specialized plate which holds locks as if they were still in the vehicle. The Impressioning Plate works with your vise to hold Chrysler, Ford, American Motors, Toyota, Datsun and all standard cam locks. Made of stainless steel, it will hold all of the above locks firmly without crushing the outside casing. A must for every shop.

Part No.: KDX K 8

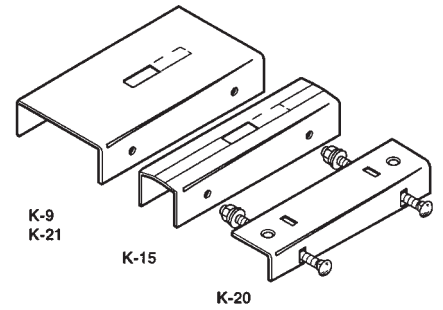

Protect-A-Lok

Finally a product designed to protect locks and other hardware from impact damage, The Keedex K-12 Protect-A-Lok, made from Lexan polycarbonate, is virtually indestructible. Designed for use in areas where locks may have a chance of getting hit by carts, forklifts, or moving vehicles. Can be used with levers, knobs, or panic hardware with any size backset. Installs in minutes. Guaranteed for five years.

KDX K 14X6	1/4 x 6"
KDX K 38X4	3/8 x 4"
KDX K 38X6	3/8 x 6"

Security Guide & Bolt

Customers with double aluminum glass doors on their business require more than security — the Keedex K-17 Security Guide & Bolt helps provide the answer. With a relatively simple installation, you eliminate the possibility of a burglar breaking in by merely breaking the plastic guides and pins provided by the doors manufacturer.

Made of steel, cadmium plated to prevent rust, the Security Guide replaces the plastic guides of Builders Brass Works and Slide-Co. The installation of our K-15 Double DoorStyle Guard is recommended for even more security in commercial or industrial application.

Part No.: KDX K 17

Change Key Set

How many times have you searched and searched for a particular change key at the bottom of your tool box? Keedex came up with a solution. The K-18 Change Key Set is a set of the twelve most common change keys, all in a handy case. Keys fold out "knife style" to select the proper tool. Case is engraved with description of uses. Keys are made of stainless steel.

Spin Out Screwdriver

For Mortise Cylinders

How many times have you struggled, trying to remove the cam screws on mortise cylinders? The "Spin Out" is specially designed to remove even the most stubborn screws. The "Spin Out" features a screwdriver with an oversized handle for extra torque. Four sizes of interchangeable screwdriver bits — two slotted and two Phillips. Includes stand, with bronze bearing, to prevent the screwdriver from slipping. Allows you to provide constant, even pressure to the screws.

- Prevents injuries to the hands caused by a screwdriver slipping
- Prevents stripped-out screw heads
- Allows for the removal of even the most stubborn screws

Part No.: KDX SPIN

Tamper Resistant Screwdriver

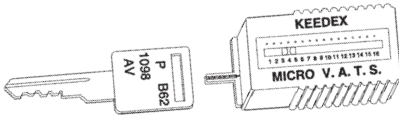

Invaluable For:

- Automotive Work
- Access Control
- Commercial/Institutional Locksmithing

This screwdriver comes with eleven interchangeable tips.

- 3 tamper resistant hex tips: 5/32", 3/16", 7/32"
- Two spanner tips (#6 & #8)
- All tips fit into the screwdriver's storage handle

Part No.: KDX TAMPER

LOCKSMITHING TOOLS
Micro V.A.T.S Interrogator

The Micro V.A.T.S. lets you interrogate the system without disconnecting any wires. No special adapters are needed. The K-VATS operates in the following fashion:

First cut a functional mechanical key for the ignition. Then insert the key into the ignition. Next slide the Micro V.A.T.S. unit over the head of the key.

Use the selector switch on the Micro V.A.T.S., to determine which of the fifteen values, is the correct one that will start the engine. It is necessary to wait the required amount of reset time (approximately 3 1/2 – 4 minutes) between attempts. The numbers on the Micro V.A.T.S. correspond to the fifteen values of the VATS key blanks.

Charts are included that allow you to use your OHM meter as a key identifier.

Part No.: KDX K VATS

Adapter for double sided VATS:

Part No.: KDX K VATS DBL

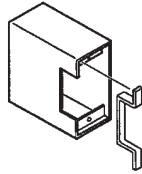

Master Follower for Corbin Russwin

The new K-6-COR is designed for Corbin Russwin locks. It is a two piece follower that can be used with both .500" and .550" plugs. Made of solid brass. It can be used as a follower, or as a master pin remover. Special taper allows smooth operation and better control over sticking pins.

Part No.: KDX K 6 COR
